Allowable Subject Matter

1. Claims 1-2, 5-22 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art does not teach that, a second switching device connected between a second terminal of the inductor and the ground voltage source, wherein the first and second switching devices keep a turned-on state during a period when energy from the source capacitor is charged in the inductor through the first path, and shut off the first path in a state in which energy has been charged in the inductor to thereby derive an inverse voltage into the inductor in combination with all limitations recited in independent claim 1.

Prior art does not teach that, (B) applying energy of the inductor to the panel using a second path that is separated from the source capacitor by disabling the first switch coupled between the source capacitor and the inductor and by disabling the second switch coupled between the inductor and the prescribed potential in combination with all limitations recited in independent claim 12.

Prior art does not teach that, a second switching circuit coupled to the first node and to the prescribed potential, wherein during a first prescribed period of time, the first and second switching circuits allow transfer of energy between the capacitor and the inductor through a first electrically conductive path, and during a second prescribed period of time, the first and second switching circuits allow transfer of energy stored in the inductor to the first node through a second electrically conductive path which

excludes the capacitor in combination with all limitations recited in independent claim 16.

The remaining dependent claims 2, 5-11, 13-15, 17-22 are allowable for at least above reason.

Prior art made of record and not relied upon is considered pertinent to applicant's disclosure. None of record prior arts stands alone or combination with the others discloses all limitations required in claim invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Walters et al (US 5,895,986) and Yamashita et al. (US 6,087,776) are cited to show a lighting control system.
